Summary

Datacenter and systems engineer with hands-on experience in server upgrades and repair, colocation hosting, production escalations and operational documentation. Built diagnostics for operators and supported infrastructure refresh planning and multi-site customer IT.

Skills

- Datacenter hardware and colocation operations
- Server repair and infrastructure refresh planning
- NOC escalations, handoffs and written procedures
- SQL, Windows Server and network troubleshooting

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Support business clients' servers, endpoints and networks, including equipment rebuilds and multi-site connectivity.
- Plan and carry out client system changes, then troubleshoot and document production issues.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Ran NOC escalations in a datacenter and colocation environment; built diagnostics and documented repeatable procedures.
- Repaired aging server hardware, delivered smaller server and firewall upgrades, and planned a larger refresh.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Developed scripts and internal workflows linking customer onboarding and provisioning across locations.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Supported small-business networks and endpoints, took escalations and built repeatable diagnostics.

Infrastructure and Systems Focal

IBM

2010 - 2012

• Supported enterprise infrastructure and wrote backup and systems automation in Perl, Bash, VBA and PHP.

Selected Projects

Excell Services

Technomancy IT client

• Rebuilt employee workstations and upgraded aging server and network infrastructure; helped connect a satellite office.

Technomancy IT Client Operations

Own product

• Built a support system that connects a customer’s tickets with device and service context.

Education

Front Range Community College

Computer Science coursework

2011 - 2013
